

## Nursecall Systems

Be an industry leader and help your staff deliver the best in healthcare

As the Australian population ages, the demand for high quality aged care solutions is increasing. To meet this need, aged care providers and families of the elderly are turning towards technology to improve facility operations and patient health.

The Advance Care Nursecall system deployed by Ericom provides real-time data to help facilities run their operations more efficiently and effectively.

The Ericom Advance Care nurse call solution improves communication, workflow, patient safety, and staffing issues in modern healthcare facilities. The system affords flexibility, scalability and reliability.

With a myriad of configuration options, the solution suits any Acute Care, Aged Care or Clinical Environment big or small, low care to high care and everything in between.

The Ericom team will ensure this top-of-the-line medical alert system is securely integrated with your existing infrastructure and continually maintained.

- ✓ **Dementia management**
- ✓ **Comprehensive reporting**
- ✓ **Real time location services**
- ✓ **Ultra long range**
- ✓ **Long battery life**
- ✓ **Call pendants and out of bed monitoring**

**ERICOM**

SYDNEY • MELBOURNE • BRISBANE • CANBERRA

**Comprehensive software** Utilising the latest in web based, zero install technologies. Providing complete reporting, mapping and integration capabilities all in one package.

**Remote administration** Inbuilt SNMP and syslog clients allow your network administrators to monitor the system in real time.

**Integration with IP telephones** Effortless connectivity offering integration to Android, Aastra, KWS8000, Spectralink and others

**Extreme battery backup** 8 hours plus battery backup due to an integral high powered 'smart charger',

**Attendance history recording** All staff attendance to rooms is logged in the client history, even if no call is placed. This enables a better understanding of patient care history and needs

**Low care to high care** Your care system grows with you; convert low care rooms to high care with the effortless future addition of dementia care devices

**Intelligent buttons** Provided as standard; a dual press function, pendant removal alert, auxiliary input, cleaning mode, backlighting and reassurance tones

**Wireless buttons and pendants** Wireless call buttons and pendants provide freedom of movement and security for both residents and staff
