

Understanding Staff Productivity

Maximising insights and analytics tools

1300 650 660

Workplace insights help you see how work happens, using data to measure behaviour and predict success. We identify collaboration patterns that impact productivity, workforce effectiveness, and employee engagement - valuable information about the way your people and teams work.

Identify collaboration patterns that impact productivity, workforce effectiveness, and employee engagement.

With Microsoft insights and analytics tools, you can manage the movements of your staff even when they are out of the office.

If your business is operating Microsoft 365, it's likely you already have these tools at your fingertips.

Our Microsoft Certified team can help demystify the insights and analytics opening your business up to new possibilities from as little as **\$198 excluding GST.**

The Microsoft 365 platform provides a range of tools that support your business to achieve more and reduce operating costs. Our team can help take you on a journey of discovery that will take your organisation to where it needs to be.

- ✓ View the presence of your staff (who is online/away/in a meeting etc)
- ✓ Insights into what documents are being worked on, by who and when
- ✓ View an employee's schedule for the day
- ✓ Access to individual profiles and view the documents they or people around them have accessed
- ✓ Create plans and tasks for staff, with the ability to receive progress updates
